

## **Digital Accessibility**

Levin Iglut is committed to ensuring that its website is accessible to all users. We continuously develop our website to meet the requirements of the World Wide Web Consortium and the Web Content Accessibility Guidelines (WCAG) 2.1 at level AA.

### **Accessibility status of the website**

This website largely meets the WCAG 2.1 AA requirements. However, some accessibility issues may still occur, such as:

- Not all images have fully comprehensive alternative text (alt text)
- Some functionalities may not yet be fully accessible using a keyboard only
- Certain pages may have minor contrast issues
- The booking system (third-party service) may have accessibility limitations

We are actively working to identify and fix these issues as part of our ongoing development.

### **Accessibility considerations on the website**

In the design and development of the website, we have taken into account:

- A clear and logical page structure
- Responsive design for different devices
- Sufficient contrast between text and background in most cases
- Consistent use of heading levels
- Clearly labeled links and buttons

### **Feedback and contact information**

We welcome feedback on the accessibility of our website. If you notice any accessibility issues or need content in a more accessible format, please contact us:
